Decisions and Comments

Decisions required: None as this time.

Comments: I do wish to be fully transparent and report the contents of the township phone that was turned over to the road supervisor and his assistant. The phone turned over to us contained dozens of text messages and other data. A review of the messages results in the appearance that one of the purposes of the road coordinator position included harassment of the contractor and to overthrow the contractor model. The texts tell a lot about motives. The messages refer to contacts with attorneys, pre-arranged bar meetings; discussed strategies; concocted accusations and the clerk's expressed hope that a certain citizen will give scathing public comments to address "the assholes." If any further note of these ridiculous and sometimes crude texts is needed, it should be a direct and complete apology to the citizens. The phone and its content is township property.

Continued

The responsibilities of the road supervisor and his assistant are outlined in the MAT manual. The job description you crafted for the road coordinator position is over.

Our sincere concern is for managing road costs and reliable contactors relationships together with quality road maintenance. The results will prove that we are achieving our goals.

Thank you for your support.
